5.1 296-Pin SPGA Package

The pin assignments for the 6x86 CPU in a 296-pin SPGA package are shown in Figure 5-1. The pins are listed by signal name in Table 5-1 (Page 5-2) and by pin number in Table 5-2 (Page 5-3). Dimensions are shown in Figure 5-2 (Page 5-4) and Table 5-3 (Page 5-5).

Thermal Characteristics

5.2 Thermal Resistances

Three thermal resistances can be used to idealize the heat flow from the junction of the 6x86 CPU to ambient:

θ_{JC} = thermal resistance from junction to case in °C/W

θ_{CS} = thermal resistance from case to heatsink in °C/W,

θ_{SA} = thermal resistance from heatsink to ambient in °C/W,

$\theta_{CA} = \theta_{CS} + \theta_{SA}$, thermal resistance from case to ambient in °C/W.

$T_C = T_A + P * \theta_{CA}$ (where T_A = ambient temperature and P = power applied to the CPU).

To maintain the case temperature under 70°C during operation θ_{CA} can be reduced by a heatsink/fan combination. (The heatsink/fan decreases θ_{CA} by a factor of three compared to using a heatsink alone.) The required θ_{CA} to maintain 70°C is shown in Table 5-4. The designer should ensure that adequate air flow is maintained to control the ambient temperature (T_A) .

Table 5-4. Required θ_{CA} to Maintain 70°C Case Temperature

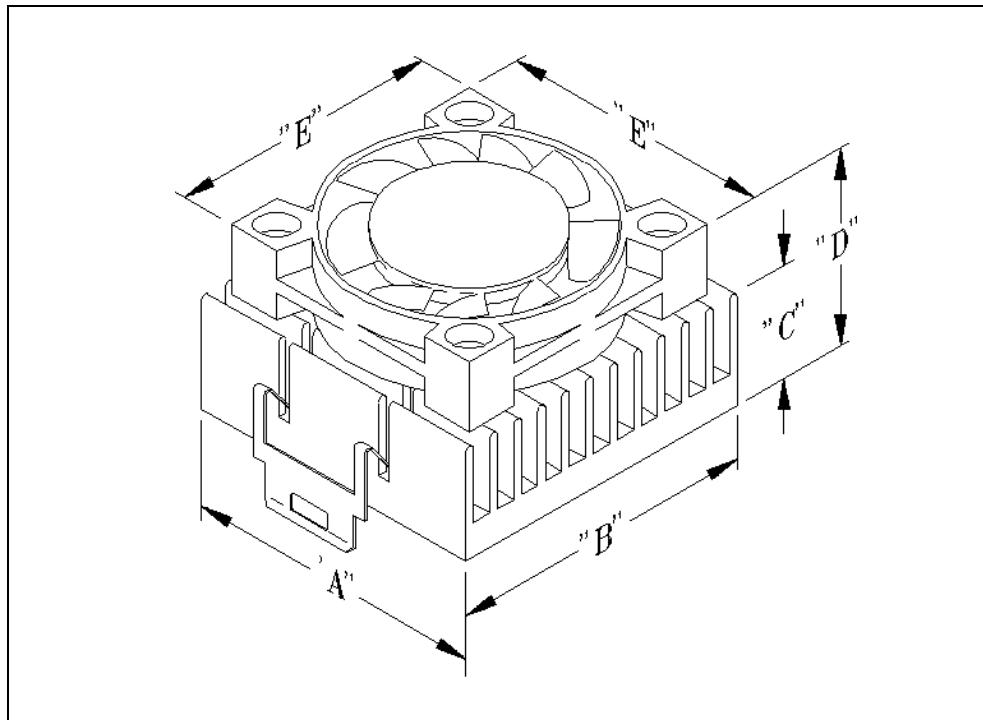

Part Number	Frequency (MHz)	Maximum Power (W)	θ_{CA} For Different Ambient Temperatures				
			25°C	30°C	35°C	40°C	45°C
6x86 - P120 ⁺	100	19.44	2.31	2.06	1.80	1.54	1.29
6x86 - P133 ⁺	110	20.88	2.16	1.92	1.68	1.44	1.20
6x86 - P150 ⁺	120	21.96	2.05	1.82	1.59	1.37	1.14
6x86 - P166 ⁺	133	23.76	1.89	1.68	1.47	1.26	1.05

In most cases a heatsink/fan similar to one of two assemblies made by Thermalloy is recommended. Thermalloy heatsink/fan part number TCM20750 ($\theta_{CA} = 1.28^\circ\text{C}/\text{W}$) can be used with the 6x86-P90⁺, 6x86-P120⁺, 6x86-P133⁺, and the 6x86-P150⁺ CPU in a typical PC system environment. A slightly larger Thermalloy heatsink/fan assembly, part number TCM20789 ($\theta_{CA} = 1.13^\circ\text{C}/\text{W}$), is recommended for the 6x86-P166⁺ CPU. Refer to the Application Note titled "Cyrix 6x86 Thermal Design Considerations" for more information.

The typical 6x86 296-pin PGA-package value for θ_{JC} is 0.9 °C/W.

Table 5-5 Heatsink/Fan Dimensions

Dimension	TCM20750		TCM20789	
	Inches	mm	Inches	mm
A	1.885	47.88	2.015	51.18
