

Some people
are promising high-performance,
low-cost imaging systems
by 1990.

We're shipping now.

At \$4995, the MVP-AT is taking the market by storm. Our new MVP-VME is about to do the same. Now, both PC and VMEbus users have a low-cost solution with a host of real-time imaging functions and extensive graphics capabilities at their fingertips:

- Frame averaging, convolutions, histograms, profiles
- Morphology – erosion, dilation, min/max operations
- Pattern matching, color processing, feature extraction
- Color and monochrome frame grab
- 12-bit monochrome/24-bit color display
- On-board Hitachi ACRTC

- PC software support
IMAGER-AT – Matrox subroutine library and interpreter for fast applications development
Image-Pro – Media Cybernetics image processing software package

And Matrox has incorporated additional features into the MVP-VME to enhance system development – all for \$5995!

- Motorola 68000 CPU
- Downloadable user code with 512K RAM
- 256K imaging firmware
